Innovating Indiana Strategic Skills Initiative Grant Awarded To East Central Indiana Region

NEW CASTLE – East Central Indiana has been awarded a grant from the Indiana Department of Workforce Development as part of a program aimed at creating new jobs and increasing personal income for Hoosiers. East Central Indiana was awarded \$263,131 as part of more than \$2.6 million in grants in the initial phase of the Innovating Indiana Strategic Skills Initiative. Introduced earlier this year, the \$23 million Strategic Skills Initiative program works with Indiana's 11 regions to identify key skills gaps in high-wage, high demand occupations.

Representatives from business, education, labor, economic and workforce development throughout East Central Indiana developed the plan, which will identify and quantify short-term and long-term skills shortages, and create and implement regional solutions. The initial funding for East Central Indiana is aimed at identifying resources necessary for executing research and analysis activities throughout the entire six months of the first phase.

“Historically, Indiana has struggled to effectively address skill shortages, and this has resulted in a loss of jobs and wages lower than the national average,” said Indiana Workforce Development Commissioner Ron Stiver. “Governor Mitch Daniels has charged our agency with identifying innovative ways to help increase jobs and personal income for Hoosiers. This initiative enables us to anticipate skills and occupational shortages, identify their root causes, and implement realistic solutions for prevention of job loss, retention of regional talent and attraction of jobs paying competitive wages.”

The announcement rewards Region 6, comprised of Delaware, Henry, Rush, Blackford, Jay, Randolph, Wayne, Fayette and Union counties, with a grant worth \$263,131 for their work on the initial phase of the Innovating Indiana Strategic Skills Initiative.

“Helping to create high paying jobs for Hoosiers is our top priority,” said Barbara Street, East Central Indiana Workforce Investment Board Director. “These funds will be utilized to ensure that our region be able to identify the workforce needs of our specific counties and will help establish long-lasting and high paying jobs for our citizens.”

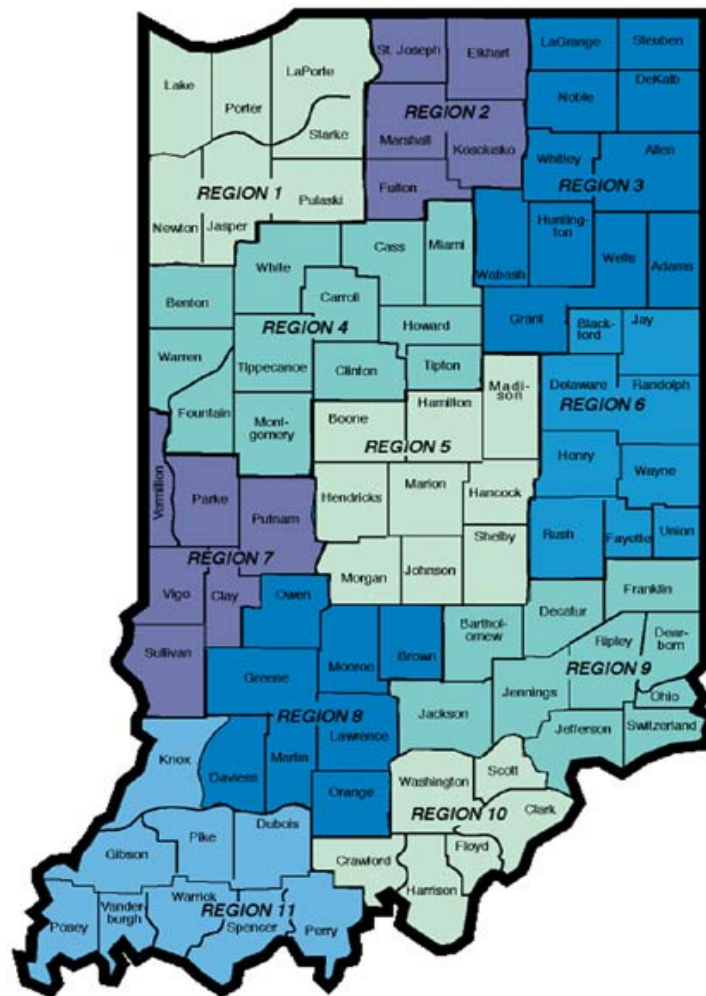

Regions will now begin Phase II and compete for the remaining \$20 million to create new jobs, reduce skill gaps, and increase Hoosier income. Regions will be held accountable for achievements in their two-year action plans.
